

1. Which of the following represents the solution set for the inequality $|3x + 4| > 18$?
2. What is the sum of the solutions to the equation $3|3x + 1| = 6$?
3. How many integer values of x satisfy the inequality $|4x + 2| \leq 16$?
4. What is the sum of the solutions to the equation $2|3x + 7| = 28$?
5. Jackson aims to complete his cross-country running route in 18 minutes. His actual time t varies by no more than 1.5 minutes. Which inequality represents all possible values of t ?
6. If $|4x - 10| = 8$, what is the positive value of x ?
7. What is the sum of the solutions to the equation $2|5x - 9| = 20$?
8. If $|2x + 3| = 11$, what is the positive value of x ?

9. Which of the following represents the solution set for the inequality $|x - 5| > 4$?
10. How many integer values of x satisfy the inequality $|3x - 8| \leq 20$?
11. If $|3x - 6| = 3$, what is the positive value of x ?
12. Which of the following represents the solution set for the inequality $|5x + 8| > 18$?
13. If $|4x - 2| = 20$, what is the positive value of x ?
14. Jackson sets a target of answering 45 questions correctly on his practice test. He wants his actual correct answers, y , to be within 3 points of his target. Write an absolute value inequality representing this goal.
15. If $|2x - 2| = 8$, what is the positive value of x ?
16. How many integer values of x satisfy the inequality $|4x + 5| \leq 10$?

17. Which of the following represents the solution set for the inequality $|3x - 1| > 7$?
18. Which of the following represents the solution set for the inequality $|4x + 8| > 9$?
19. If $|5x - 5| = 5$, what is the positive value of x ?
20. If $|4x - 7| = 13$, what is the positive value of x ?
21. Which of the following represents the solution set for the inequality $|5x + 5| > 7$?
22. If $|5x + 2| = 10$, what is the positive value of x ?
23. What is the sum of the solutions to the equation $1|4x + 4| = 4$?
24. Which of the following represents the solution set for the inequality $|3x - 7| > 14$?

25. How many integer values of x satisfy the inequality $|x + 4| \leq 16$?

26. What is the sum of the solutions to the equation $1|x + 7| = 7$?

27. How many integer values of x satisfy the inequality $|2x + 1| \leq 5$?

28. How many integer values of x satisfy the inequality $|2x - 3| \leq 18$?

29. What is the sum of the solutions to the equation $2|5x + 5| = 40$?

30. How many integer values of x satisfy the inequality $|2x - 9| \leq 13$?

31. If $|5x - 8| = 13$, what is the positive value of x ?

32. What is the sum of the solutions to the equation $1|5x - 3| = 7$?
